The Essex Rural Strategy is a key document which highlights the priority issues for rural Essex and a vision for the future of the county. The document is written by Essex Rural Partnership, with over 80 member organisations sharing ownership. These members can refer to the guidance of the strategy to offer evidence and support for funding bids, project proposals and lobbying work to help those who live and work in rural Essex. The strategy is also used to raise the profile of rural Essex, influencing future strategic documents and encouraging joint working.
